Overview

Is SolarSpace launching a 5GW high-efficiency solar cell plant in Laos?

SolarSpace, a China-based PV cell and module manufacturer, announced the first phase of a 5GW high-efficiency solar cell plant in Laos, giving momentum to its overseas production capacity. SolarSpace marked the start of the first phase of its 5 GW high-efficiency solar cell plant in Laos at a recent launch event in the Saysettha Development Zone.

Why is SolarSpace launching a solar project in Laos?

The company said it has an experienced production and management team in Laos, and those people will play a leading role in the development of the nation's clean energy industry. Laos is a new manufacturing location for SolarSpace, which has traditionally been more active in solar projects in the country.

Does Laos have a solar sector?

The news is also a positive development for the Laos solar sector. Last year, the country began construction on its first large-scale solar farm, a 50MW project in the south-east province of Attapeu, and the government has already made plans to expand its solar sector further.

Can Laos build a floating solar power project?

In 2020, Laos also signed a Project Development Agreement (PDA) with China's Hangzhou Safefound Technology Company to develop a floating solar power project at Nam Ngum 1, with an installed capacity of up to 1,200 MW on an area of more than 1,500 ha. Once put into operation, it will be the largest floating solar power project in the world.

Will Laos build a solar farm?

The construction of the proposed solar farm will take place in three stages over 10 years. In 2020, Laos also signed a Project Development Agreement

(PDA) with China's Hangzhou Safefound Technology Company to develop a floating solar power project at Nam Ngum 1, with an installed capacity of up to 1,200 MW on an area of more than 1,500 ha.

Is Laos a good country to invest in solar?

The government aims to increase the contribution of renewables to 11% by 2025, and while SolarSpace did not specify where its Laos-made modules would be shipped, the presence of a major manufacturing facility in the country is an important step in demonstrating the viability of Laos as a country capable of significant solar investment.
