of an.

This information must be preceded or accompanied by a current prospectus.  
For standardized performance, please see the Performance section above.

Business Involvement metrics can help investors gain a more comprehensive  
view of specific activities in which a fund may be exposed through its.

To be included in MSCI ESG Fund Ratings, 65% (or 50% for bond funds and  
money market funds) of the fund's gross weight must come from securities  
with ESG coverage by MSCI ESG Research (certain cash positions).

The amounts shown above are as of the current prospectus, but may not  
include extraordinary expenses incurred by the Fund over the past fiscal year.  
Amounts are rounded to the nearest.

The Climate Investment Funds (CIF) – the world's largest multilateral fund  
supporting energy storage in developing countries – is working on bridging  
this gap. Which energy storage stocks are a good investment?

Albemarle is the top holding, followed by Tesla, so if you can't decide from the  
previous stocks, this fund is a good one-stop investment to play the pending  
energy storage boom. With more than \$1 billion under management and  
about 60 components, this First Trust fund is another interesting and  
diversified way to play energy storage.

What is the iShares energy storage & materials ETF?

The iShares Energy Storage & Materials ETF (the "Fund") seeks to track the  
investment results of an index composed of U.S. and non-U.S. companies  
involved in energy storage solutions aiming to support the transition to a low-  
carbon economy, including hydrogen, fuel cells and batteries.

What is the future of energy storage?

Storage enables electricity systems to remain in balance despite variations in wind and solar availability, allowing for cost-effective deep decarbonization while maintaining reliability. The Future of Energy Storage report is an essential analysis of this key component in decarbonizing our energy infrastructure and combating climate change.

Is CIF funding the next frontier in energy storage?

CIF is also fueling the next frontier in energy storage: \$70m in CIF funding is set to help kick-start a \$9 billion energy revolution in Brazil, which includes substantial investments in energy storage, such as pumped hydro and green hydrogen development.

What are some interesting energy storage ETFs?

Another interesting energy storage ETF is GRID, which is focused on alternative energy infrastructure companies such as power management company Eaton Corp. (ETN), industrial conglomerate Johnson Controls International PLC (JCI), and electronics and automation pioneer Abb Ltd. (ABB).

Why is energy storage important?

Storage is indispensable to the green energy revolution. The most abundant sources of renewable energy today are only intermittently available and need a steady, stored supply to smooth out these fluctuations. Energy storage technologies are also the key to lowering energy costs and integrating more renewable power into our grids, fast.

## Leading fund for new energy storage
