ETFs like First Trust Global Wind Energy provide diversified exposure to the wind energy sector. Key findings are powered by ChatGPT and based solely off the content from this article. Findings are reviewed by our editorial team.

Are wind energy stocks a good investment?

For one thing, wind energy is a clean and sustainable energy source, which makes it an attractive investment for those looking to support environmentally responsible companies. Moreover, wind energy stocks tend to be less volatile than traditional energy stocks, as they are less susceptible to fluctuations in oil and gas prices.

Is Plug Power a good wind energy stock?

The company designs its fuel cell systems to provide efficient, clean, and reliable power for various applications, including forklifts, airport ground support equipment, stationary power for backup, and remote power. Plug Power is, however, good wind energy stock because of its significant investments in alternative energy.

Is Northland Power a good wind energy stock?

Northland Power also trades over-the-counter (OTC) in the U.S. under the ticker NPIFF. These are the top wind energy stocks as ranked by a growth model that scores companies based on a 50/50 weighting of their most recent quarterly YOY percentage revenue growth and their most recent quarterly YOY earnings-per-share (EPS) growth.

How many wind energy stocks does ETF hold?

As of mid-2024, it held more than 55 wind energy stocks. Of note, its top 10 holdings included Vestas Wind Systems, Siemens Energy, and NextEra Energy. The ETF has a heavy concentration of foreign-listed wind energy stocks; Denmark-listed wind stocks made up the largest country share of its portfolio, at almost 17%.

Is wind energy a good investment?

Although wind energy is growing in importance, few companies focus solely on manufacturing wind turbines and components or producing wind energy. Only a couple trade on major U.S. stock exchanges. That leaves investors with few domestic pure-play wind energy investment opportunities.
