Longi photovoltaic panel 370w

Overview

Great power output and greater energy yields. Outstanding power output in low irradiance conditions, such as dawn, dusk and cloudy days. Positive tolerance of maximal power guaranteed (0~ 5W).

The low thermal coefficient produces greater energy production at high operating temperatures. The module provides a high energy yield at low NOCT = 45°C (±2°C).

A low 0.55% annual degradation rate after an initial first-year degradation of less than 2% is made possible due to low LID Mono PERC technology.

This module comes with a 10-year product warranty on materials and processing and a 25-year extra linear power output warranty.

The module's 40 mm frame design provides easy installation and ensures robust mechanical strength. It is able to withhold a heavy snow load up to 5400 Pa and wind loads up to 2400.
