Overview

How can the Maldives meet its 2030 net-zero target?

The Maldives has received assistance from the World Bank through two projects to meet its ambitious 2030 net-zero target: the Accelerating Sustainable Private Investment in Renewable Energy (ASPIRE) project, which began in 2014, and the Accelerating Renewable Energy Integration and Sustainable Energy (ARISE) project, which was signed in 2021.

How is the World Bank helping the Maldives achieve net-zero?

The World Bank has been helping the Maldives transition to clean energy and achieve its 2030 net-zero target. The recent signing of an 11-megawatt solar project will see private energy investments deployed in six population centers across the archipelago.

Is Maldives a sustainable country?

Maldives — The Land of Sun, Sea and Sand — will, over the next few years, go from being a tourist paradise to a small island nation that is leading the way in showcasing energy sustainability to the world.

What is Maldives' energy transition?

This publication serves as a guide for Maldives' energy transition—from being powered by costly and polluting fossil fuels to being sustained by clean and efficient renewable energy sources. PDF (3.42 MB) ePub (15.84 MB).

Does the Maldives have electricity?

The Maldives has succeeded in bringing electricity to even the most isolated atolls, resulting in 100% electricity connectivity in the archipelago - but also, tragically, near-complete reliance on diesel fuel to run the generators.

How will aspire and rise help the Maldives' energy transition?

World Bank-financed projects ASPIRE and ARISE support the Maldives' energy transition by installing more than 53.5 megawatts of solar capacity and 50-megawatt hours of battery storage. This will reduce Maldives' annual import bill by about \$30 million, with a project lifetime saving of \$756 million over 25 years.
