Manage and install photovoltaic panels

Overview

Should you choose a solar photovoltaic system?

Solar photovoltaic (PV) systems have become an increasingly popular choice for those looking to reduce their carbon footprint and save money on energy bills. Before choosing a new system, homeowners should know how a roof can impact options, the best ways to connect the panels, and more.

Should I install solar panels on my roof?

Solar installation is complex, and you don't want to jeopardize such a costly investment. Take the time to properly think through and set up your project before beginning. First, check that your property is suitable for a solar power system. Your roof needs to have enough surface area for the panels required to supply your energy needs.

Why should you install a photovoltaic system?

Installing photovoltaic (PV) systems is a key stride toward embracing renewable energy, which is crucial for reducing carbon footprints and fostering sustainable energy use. Starting with a detailed site assessment to evaluate solar potential and optimal setup, the process ensures efficiency and compliance from the get-go.

What is the installation phase of a photovoltaic system?

The installation phase of photovoltaic (PV) systems is a critical step that involves several key activities to ensure the system operates effectively and safely. Here's a more detailed look at what this phase entails:

How are solar panels affixed to my property?

Your solar array will be affixed to your property using racking and mounting systems. Rooftop solar panel systems will have a fixed mount system, keeping the panels stationary on your roof. All rooftop mounting systems serve the same functional purpose but can differ in how they're installed.

Should I add a solar energy system to my roof?

You may be considering the option of adding a solar energy system to your home's roof or finding another way to harness the sun's energy. While there's no one-size-fits-all solar solution, here are some resources that can help you figure out what's best for you. Consider these questions before you go solar. See the Spanish version [here](#).
