Martinique solar panels products

Overview

Does albioma have a power plant in Martinique?

Against the backdrop of the energy transition, this new facility, Galion 2, covers approximately 15% of the island's power needs, while also enabling the share of intermittent energy sources such as solar power to be increased. Alongside the Group's thermal biomass activity, Albioma operates a fleet of photovoltaic power plants in Martinique.

How much energy does Martiniquan generate?

In 2018, these installations supplied 17.6 GWh of renewable electricity to the Martiniquan network, representing nearly one quarter of all photovoltaic power generated on the island. As well as contributing to the regional energy transition, this output is set to increase by around 500 kWp in 2019, as new projects come onstream.

What is albioma doing in Martinique?

Since 2007, Albioma's thermal biomass and photovoltaic businesses have been enhancing the energy independence of Martinique, which is not connected to mainland electrical networks. In Martinique, Albioma has built, commissioned and is now operating the Galion combustion turbine and the first all-biomass thermal power plant in Overseas France.

Martinique solar panels products

Galion solar power plant

The Galion solar power plant is located in Trinité, to the north of Martinique, on the roof of the island's only sugar refinery. It is located in the immediate vicinity of Galion 2, the 100% biomass power plant operated by Albioma since 2018, and has an installed capacity of 420 KWp. In 2022, it supplied 310 KWh of electricity on the grid.

Learn about SunPower Solar Panels

Frequently asked questions about SunPower solar panels How much do SunPower solar panels cost? Looking at national average pricing data, the cost of owning a 5 kW SunPower Equinox system ranges from \$13,250 to \$21,000, or from \$2.65 to \$4.20 per watt.
