

European Solar and Energy Storage Solutions

Maxem energy solutions b v Italy

Overview

What makes Maxem a sustainable e-mobility solution?

We strongly believe in a sustainable future without barriers. That is why we have developed Maxem: the combination of hardware and cloud solutions that enable you to install e-mobility and sustainable energy at scale. Maxem regulates car charging and solar power and provides you with the control needed to lower your energy costs.

Is Maxem energy cloud a white-label EV charging & energy management platform?

Amsterdam, February 1, 2022 - Maxem Energy Solutions, the developer of the white-label EV Charging (CPO) and Energy Management (EMS) platform, Maxem Energy Cloud, closed an investment round of 1 million euros in January. "The continued investment from existing shareholders V2 Capital B.

Why should you invest in Maxem energy controller?

The investment will be used, among other things, to increase the team and further develop the Maxem Energy Controller, for both the residential and industrial market. This makes it possible to better control and connect steerable energy consumers, such as charging points, solar panels, batteries and heat pumps.

Maxem Energy Cloud - Maxem

Met Maxem Energy Cloud kun je het maximale halen uit je bestaande netaansluiting. Ons platform stelt je in staat om elektrische voertuigen op te laden met een beperkte netaansluiting, tot wel 6 keer meer dan zonder Maxem Energy Cloud. Dit betekent dat je zonder zorgen je wagenpark kunt elektrificeren, zelfs als je locatie beperkte capaciteit heeft.

E-mobility & duurzaamheid in één platform - Maxem

Our cloud platform helps companies and consumers manage charging stations, solar panels and batteries more efficiently and optimize energy consumption, even with a limited grid connection. Discover Maxem Energy Cloud

Over ons - Maxem

The world is saying goodbye to the fossil world at an increasing pace and embracing the new

reality. The transition to sustainable and self-sufficient. We respond to this changing need and contribute to the acceleration of the energy transition.
