

European Solar and Energy Storage Solutions

Mexico solar battery jiji

Overview

Does Mexico have a solar energy sector?

Mexico is also supporting its solar operations with the development of several solar energy plants that include lithium-ion battery storage facilities. However, the sector still faces some restrictions such as a lack of land for solar operations.

Is solar energy a good investment in Mexico?

Solar resources in Mexico are among the best in the world, with annual daily solar irradiance levels ranging between 4.4 kWh/m² and 6.3 kWh/m². With the country's solar capacity reaching 10GW at the end of 2021, we expect solar energy to continue to present attractive opportunities for project developers and industrial consumers.

Is Mexico a good place to install solar panels?

Mexico is well suited for residential rooftop solar installations, and we expect the market to grow by roughly 10% to 15% annually through 2025. With the high cost of electricity, many are being encouraged to convert their systems to solar. This can also help tackle the uncertainty of blackouts in regions that have a higher risk of power outages.

Does Mexico have a solar system?

The Government of Mexico (GoM) has also helped to support the development of solar generation across the country, taking advantage of Mexico's average of 300 days of sunshine a year. It has extended a simple permit procedure for solar projects of a 500 kW to 2 MW capacity and offers several subsidies for solar systems.

Where/how I can get a 12V 100Ah/200Ah LiFePO4 battery in Mexico?

When I needed packages delivered in Mexico I went through AXP Logistics. They have a US depot / address where your items are delivered, then they ship them across the border and to you. Worked great. I also found out DHL delivers all over, even in incredibly remote rural areas, so that's an option too.
