

## European Solar and Energy Storage Solutions

# New Energy Storage Battery Factory

## Overview

---

When will Xinhua's battery factory start production?

Construction is scheduled to start early next year with production to come on line by the end of the year, the official Xinhua News Agency said. The factory won't build batteries for cars but for electric utilities and other companies to store power.

Is China still a battery manufacturing hub?

CEA says that China is still the leading battery cell manufacturing hub, but its share will decline in “coming years.” Europe has seen delays and cancellations of several planned battery factories, mostly due to high energy prices and other countries’ pro-clean energy and EV manufacturing policies luring projects away.

Where are Volkswagen EV batteries made?

In July 2022, Volkswagen set up a separate battery company, PowerCo SE, to build batteries for its upcoming EVs. Since its launch, the company has decided on the location of three cell factories: Two in Europe (Salzgitter, Germany, and Valencia, Spain) and one in North America (St. Thomas, Canada).
