New Zealand lemania energy

Overview

What energy sources are used in New Zealand?

Electrical energy in New Zealand is mainly derived from renewable energy sources such as from hydropower, geothermal power and wind energy. The large share of renewable energy sources makes New Zealand one of the most sustainable countries in terms of energy generation.

When will the New Zealand energy strategy be published?

We will be updating this page over the course of the year. The strategy will be published by the end of 2024. The Government is developing the New Zealand Energy Strategy to support the transition to a low emissions economy, address strategic challenges in the energy sector, and signal pathways away from fossil fuels.

How does New Zealand meet its energy needs?

New Zealand relies on a combination of domestically produced and imported fuels to meet its energy needs. A common metric used internationally to measure this is a self-sufficiency indicator, which shows how well we can meet our own energy supply needs through domestic production.

How can we improve New Zealand's energy supply?

Through the use of efficient technologies and processes, we can improve the affordability and reliability of New Zealand’s energy supply. Demand management is becoming increasingly important as our electricity demand increases and we transition toward greater use of renewable energy sources.

What are New Zealand's energy supply and demand challenges?

In brief : While New Zealand’s energy supply side challenges capture headlines and headspace, the demand side of the equation is often overlooked. High electricity prices and recent policy shifts make it challenging to attract and retain industrial customers.

Who is responsible for energy use in New Zealand?

The Ministry of Business, Innovation and Employment is responsible for economic issues surrounding energy use and the Ministry for the Environment addresses the environmental cost of energy use in New Zealand. Exploration and production of fossil fuels comes under Crown Minerals, a division of the Ministry of Economic Development.
