

European Solar and Energy Storage Solutions

New Zealand pzem energy bv

Overview

Who is pzem energy company?

PZEM Energy Company B.V is a subsidiary of EP NL, which, in its turn is a subsidiary of the EPH Group. EP NL is a key player in the Dutch energy market with installed capacity of 2.6 GW and a 1.5 GW portfolio of power purchase agreement. We focus on electricity generation, trading and the supply of energy and solutions for businesses.

Who owns Zeh & pzem energy company?

ZEH is a public limited company, with the Province of Zeeland owning half of the shares and the rest almost entirely owned by the various municipalities in Zeeland. PZEM Energy Company B.V is a subsidiary of EP NL, which, in its turn is a subsidiary of the EPH Group.

Will pzem provide electricity to NS?

On Wednesday, September 6th, it was announced that PZEM, in combination with Shell, will provide NS with the supply of electricity for train operations starting from January 1st 2025. NS, on behalf of the rail sector (under the name of cooperative VIVENS and CIEBR), invited the tender.

How does pzem contribute to a sustainable economy?

As a responsible producer, trader, and supplier of electricity, PZEM contributes the transition to a sustainable economy. The importance of analytical competences and advanced quantitative methods has significantly increased during the last years due to the increasing complexity of markets, assets and products.

Why should you choose pzem?

With access to fast cycle gas storage capacity PZEM provides short-term flexibility solutions to gas portfolios. Besides, with our highly efficient CCGT power plant, we play a crucial role in providing the necessary flexibility on the

power side to manage volatile production from renewable energy sources.

Why does EP NL need a low-emission gas-fired power plant?

Its modern, low-emission gas-fired power plants play a crucial role in providing the required flexible capacity to the energy system, allowing EP NL to react quickly to changing market conditions such as fluctuating prices, increasing renewable energy sources and changing grid conditions.
