No idea how to install photovoltaic panels

Overview

Before installing solar panels, you must evaluate your home's energy needs and design to determine if a solar photovoltaic (PV) system is right for you.

Several solar panel manufacturers offer do-it-yourself (DIY) installation kits for solar projects. These kits include solar panels, inverters, wiring, and other needed equipment. There are also solar panel kits for smaller installations.

Installing solar panels helps homeowners save money and invest in cleaner energy. To prepare for an installation, determine your energy needs and home compatibility with a solar panel system.
