Nova solar energy Myanmar

Overview

Can solar power help a disadvantaged population in Myanmar?

“Moreover, solar can help ensure a just energy transition for citizens affected by energy poverty. Furthermore, 75–85% of Myanmar’s population of lives within a 25–50-kilometer radius of high voltage power lines, which makes for ideal locations to develop medium- and large-scale solar projects,” they noted.

Does Myanmar have solar energy?

Levels vary widely across this geographically diverse Southeast Asian nation, but on the whole, Myanmar is endowed with an abundance of solar energy resource potential, an average solar irradiance of 4.5–5.1 kilowatt-hours per square meter per day (kWh/m²/day).

Is solar energy gaining traction in Myanmar?

Solar energy is just beginning to gain some traction in Myanmar, a country that has been gradually opening up its economy and society to the world since 2011.

Who commissioned Myanmar's first commercial solar power plant?

State Counselor Aung San Suu Kyi in June 2018 officially commissioned the first, 50-MWdc/40-MWac, phase of Myanmar’s inaugural commercial solar power facility, the 220-MWdc/170-MWac, US\$297 million Minbu Solar Power Plant.

Is Myanmar a good country for generating electricity?

Renewable energy, in the form of large-scale hydroelectric power, already accounts for around 60%, the single largest share, of Myanmar’s electricity generation mix. The country also has an abundance of natural gas, an important export and the source of hard, foreign currency export revenues, as well as domestic power generation.

Will Myanmar achieve universal electricity access by 2030?

“Following the lifting of sanctions in 2011, Myanmar launched an ambitious investment program, with both government and private sector participation, to develop its energy infrastructure and provide universal electricity access by 2030,” the World Bank highlighted in its June 2019 Myanmar Economic Monitor.
