Optergy bms Gabon

Overview

What is optergy BMS?

Accessible securely via any network-connected device, our system ensures you're always in control, wherever you are. Optergy's BMS solution provides a suite of advanced tools to streamline information access: Create bespoke user profiles with varying levels of access—from full system control to view-only modes.

What is optergy enterprise software?

Optergy Enterprise software provides a web-based, real time scalable solution to improve control and reporting within buildings. It is an exclusive Building Management System and Energy Management System that provides a full suite of tools to measure, manage, report and analyze building data to make it a Smart Building.

Why should you choose optergy BMS through leading edge automation?

Tailor experiences for different team members or restrict access to energy management only, focusing on individual energy consumption metrics. By adopting the Optergy BMS through Leading Edge Automation, you're choosing a smart, secure, and efficient way to manage your building's ecosystem. Keep up to date with the latest automation news.

What is optergy Malaysia?

Optergy Malaysia is moving. For 'BMS/EMS system go to Leading Edge Automation, and for Smart Building Solutions go to Operational Intelligence
Optergy Enterprise software provides a web-based, real time scalable solution to improve control and reporting within buildings.

How does optergy enterprise work?

Automatically generate any utility billing content for all your tenants, as well as the ability to charge for after hour usage. Optergy Enterprise is web-based

building management software that automatically controls and monitors all building operations and equipment.

What applications can I integrate with optergy's smart edge controller?

Smart buildings feature numerous applications that require integration using Optergy's Smart Edge Controller. Applications include systems such as HVAC, central plant, VRF, lighting, hydraulic systems, along with energy, water & gas monitoring.
