Estonian Military Blocks Wind Development

Its air defence radar help keep it secure - monitoring international airspace through the Gulf of Finland to the north which is used to access the Baltic sea by Russian military jets. Pager Power provides Wind ...

Finnish military radar modified for wind farms

Reported in Alaska Dispatch, EUR15.5 million euros has been set aside by the Finnish government to allow the Defence Forces to avoid large wind farms, in the vicinity of Raahe, on the northwest coast of the country, interrupting their military radar systems.. However the radar modification budget does come with a condition: wind farm owners who wish to ...

Solar Sector Services

Pager Power has a bespoke model for predicting

the times and dates throughout the year that glare effects are possible, along with a published methodology for contextualising effects. OUR SOLAR SERVICES. Pager Power is able to offer the following services within the Solar sector:

Pager power

Pager Power helps different types of infrastructure co-exist. The company assesses the technical and operational impacts that developments can have on neighbouring systems. We focus on Buildings, Renewable Energy, Telecommunications, Aviation and Radar.
