## Palau kit on grid

## Overview

---

What is a mini-grid training in Palau?

The purpose of the training was to strengthen the local technical capacity in Palau to effectively design, install, monitor and maintain renewable energy mini-grid systems.

Does Palau have a good power system?

The calibration model representing Palau's current power system also confirms this dominance of fossil fuels and the low share taken by renewable energy.

Does Palau have a national energy policy?

The Republic of Palau endorsed its National Energy Policy (NEP) in 2010. An Energy Sector Strategic Action Plan formed a guiding document for implementation of this policy.

How does Palau manage energy efficiency?

Palau initiated energy efficiency efforts to reduce government-al energy use through its Energy Conservation Strategy in 2007.

Does Palau have solar power?

Together with a large amount of diesel generation, Palau also has some installed solar PV capacity. Indeed, the country's current renewable energy capacity includes a total of 2.5 MW of utility-scale solar PV systems (see Table 3).

Will Palau achieve a fully decarbonised power system?

In conclusion, by following the recommendations outlined in this roadmap, the Republic of Palau will be on the road to achieving a fully decarbonised power system, based on solar and wind power for electricity and transport and

supported by battery storage and green hydrogen. 1. INTRODUCTION TO THE  
PALAU ROADMAP 1.1. ROADMAP OBJECTIVE

## **The Republic of Palau Partners with GridMarket and EARTHx**

This public-private partnership will transition Palau's energy economy away from a dependency on imported diesel and towards a resilient, self-sustaining energy infrastructure. By implementing solar PV, wind, and battery storage, Palau will strengthen its grid, reduce energy costs, and emit significantly less carbon.
