Panama phoenix solar energy

Overview

Will Panama's solar thermal plan save the world?

When fully implemented, Panama's National Solar Thermal Plan will prevent the release of 2.4 million tonnes of carbon dioxide and save Panamanians more than US\$110 million annually on fossil fuel bills. Solar powered rooftop heaters are providing hot water for students and staff at the Hato Chami school in northern Panama. Photo: UNEP.

What is Termosolar Panama?

Termosolar Panama is part of a wider Panamanian effort to move away from fossil fuels. This includes a national strategy to deploy 1 million square meters of solar thermal technology throughout the country by 2050.

Could solar hot water heating help reduce deforestation in Panama?

Alongside countering deforestation, solar hot water heating could also help Panama cut its reliance on fossil fuels, particularly liquefied petroleum gas. A driver of climate change, according to Termosolar Panama the fuel is used to heat most of the over 30 million litres of hot water Panamanians use daily.
