## Overview

---

NREL analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. This work has grown to.

U.S. Solar Photovoltaic System and Energy Storage Cost Benchmarks, With Minimum Sustainable Price Analysis: Q1 2023, NREL Technical.

How much does solar installation cost?

National Renewable Energy Laboratory (NREL) data shows installation labor makes up 7 percent of the total cost of solar, making the average cost of solar installation in the US about \$2,209. The more solar panels you install, the higher the installation cost because the process takes more time and labor.

How much does a solar project cost?

For example, if you receive a solar quote for \$25,000, you can expect labor to make up around \$1,375 of the all-in cost. (Check out our solar calculator to estimate the cost of your project.).

What are soft costs for a solar and battery project?

Soft costs include administration costs for the company, customer acquisition and marketing, system design, permits and fees for connecting to the grid, and labor for installation. Here's the NREL's latest soft costs breakdown of a solar and battery project:.

How do I get the best value on solar panels?

Here are some tips to get the best value on solar panels for your home. Get multiple quotes. Receive and compare several quotes for solar to compare the total cost, quality of products and warranty terms. If you find a company you like but their price is higher than another, ask if they will price match.

Should you install a solar energy system on your roof?

When you install a solar energy system, you're getting more than just solar panels on your roof. Multiple pieces of equipment, such as racking, wiring, and inverters, must be installed so the solar panels can power your home. There are also a number of costs that ensure your system is installed correctly and that the solar company can operate.

How much does a solar panel repair cost?

Most homeowners spend between \$200 and \$1,250 on solar panel repairs or an average of \$720. But what you'll pay for solar repairs depends on the type of panel, its size, and the extent of its damage. Small fixes could cost as little as \$100, while extensive repairs or replacements could add up to \$3,600 or more.
