Photovoltaic panel brokerage contract

Overview

What is a solar power purchase agreement (solar PPA)?

With a solar power purchase agreement (solar PPA), you contract with a solar developer that pays for, installs, and maintains a solar system on your property. The system could include ground-mounted, rooftop, or carport solar panels (or any combination thereof), and it could include an energy storage system.

Can a provider sell a photovoltaic system to a customer?

WHEREAS, Provider has offered, at his sole cost and expense, to install, maintain, own, replace, repair, and operate a photovoltaic system at one or more of the Property (ies) and to sell Solar Services (as hereafter defined) produced by the solar photovoltaic system to Customer as provided in and subject to the provisions of this Agreement.

Should homeowners pay for solar panels upfront?

Homeowners who pay for their panels upfront with cash, or through a solar loan, will see something different than someone who signs a solar lease or solar power purchase agreement (PPA). While solar contracts will differ by provider and project, most of them contain a certain amount of shared verbiage and content.

What financing options are available for solar panels?

Power purchase agreements. Many \$0-down financing options are available for going solar, including ownership (i.e., solar loan) or third-party-owned (i.e., leases) solutions. Many homeowners looking for an easy, low-cost, maintenance-free way to install a solar panel system move forward with a power purchase agreement (PPA).

What is a PV installation agreement?

The Installation Agreement is a lump-sum agreement between the project

company, as owner of the project, and the installation contractor, the contractor that will be responsible for installing the PV system, providing the balance of plant and commissioning the plant.

How does a solar PPA differ from a lease?

Unlike solar leases, PPA charges vary from month to month since your bill is based on the solar panel system's production. Because solar panels typically produce more electricity during the summer than during the winter, most people experience higher PPA payments during the summer months and more savings on utility bills.
