# Photovoltaic panel charging 200a battery

## Overview

---

Here are some charts on what size solar panel you need to charge 12v and 24v 200ah lead acid or lithium (LiFePO4) battery.

The maximum charging current for a 200Ah lithium battery is usually 100A and the ideal charging current for a lead-acid or AGM battery is 50A. Charging your battery at a higher rate.

Cut to the chase, to charge a 200Ah lithium battery effectively, you'll need approximately 610 watts of solar panels if you're using an MPPT charge controller. That's the abridged answer.

Cut to the chase, to charge a 200Ah lithium battery effectively, you'll need approximately 610 watts of solar panels if you're using an MPPT charge controller. That's the abridged answer.

To fully charge a 200Ah lithium battery, you need approximately 1,000 watt-hours of solar power daily.

Result: You need about 500 watt solar panel to charge a 12v 200ah lithium battery in 6 peak sun hours using an MPPT charge controller. What Size Solar Panel To Charge 200ah Battery?
