# Photovoltaic panel design drawing

## Overview

---

HD satellite imagery, AI-assisted 3D modeling and roof detection give you a clear and exact picture of the rooftop, so you can show your customer an accurate representation of what their roof will look like.

Automatic population of the rooftop using an irradiance map and shading analysis optimum placement of the solar panels, so you can deliver the best.

Get the most out of the solar system with automatic electrical design calculation providing you with the best recommendation for highly efficient solar system planning. Including.

Smart Energy Home Ecosystem Get insight into potential household electricity savings when adding SolarEdge smart home devices to your system designs. Storage & Backup Plan the home energy storage and backup.

Generate accurate sales proposals, ensuring your customers get the full picture on the spot. With energy simulation, financial.

Does proficad support photovoltaic circuit diagrams?

ProfiCAD supports the drawing of photovoltaic circuit diagrams. In addition to the common electrical engineering symbols, the library includes symbols such as solar cells, photovoltaic panels, solar collectors, inverters, etc. Should you need more symbols, you can create them in the symbol editor. Some sample drawings (click for full size):.

How much space does a photovoltaic system need?

Photovoltaic modules installed on the ground or on a flat surface occupy an area of approximately 20 m<sup>2</sup>/kWp, avoiding shading between the rows of modules. The design of a photovoltaic system, from the public operator's network to the photovoltaic modules, requires careful planning and compliance with local regulations.

How much space does a photovoltaic module occupy?

Photovoltaic modules installed on a sloping roof or facade occupy an area of

approximately 8 m<sup>2</sup>/kWp. Photovoltaic modules installed on the ground or on a flat surface occupy an area of approximately 20 m<sup>2</sup>/kWp, avoiding shading between the rows of modules.

Do I need to redraw my module layout in PVSyst?

There's no need to redraw your module lay-out in PVSyst. Thanks to our pv plugin, you can simply export your drawings from AutoCAD or BricsCAD to within seconds and start simulating the performance and yield of your system immediately. Both fixed tilt and tracker systems are supported by the .PVC export format or .CSV of ground mesh.
