How to choose a solar panel installation site?

Prioritize ease of maintenance when selecting your solar panel installation site. The panels should be accessible for regular cleaning, as dust, bird droppings, snow can accumulate and reduce their effectiveness. — Remi Akinwonmi, solar expert and clean energy advocate, Advisory Board Member
Wondering how to install solar panels?

.

What is solar panel cleaning?

First and foremost, let us introduce the two different terms discussed in this article: Solar panel cleaning: this entails washing the panels like windows. The cleaning may be combined with preventive maintenance of the solar collectors.

What are photovoltaic panels & how do they work?

Photovoltaic panels, or solar panels, are the most crucial component of a solar power system. They are responsible for converting sunlight into direct current (DC) electricity through a process called the photovoltaic effect. Solar panels are made up of many individual solar cells, which are usually made from silicon, a semi-conducting material.

Should I ask my solar installer to clean my panels?

As a matter of fact, you may also ask your solar installer to clean your panels while he is performing routine technical maintenance. He can execute this task in complete security. Preventive maintenance involves booking an appointment with your solar installer to verify that everything is in order.

What are photovoltaic panels?

Photovoltaic (PV) panels are devices that convert sunlight into electrical

energy using semiconductor materials. This process is known as the photovoltaic effect. PV panels are an essential component of solar power systems and are increasingly being deployed for both residential and large-scale power generation purposes.

Should you hire a solar panel cleaning company?

There are a myriad of companies which offer cleaning services for each of these solar panels. Enlisting the aid of a solar panel cleaning company is a reasonable choice for very large installations known as solar farms or solar parks. Why is that?
