# Photovoltaic panel male and female connector crimping

## Overview

---

Use your wire cutters to cut your wire to length. I decided to make my wires about 6" (15 cm) long since I'll be using them as short solar adapter cables.

Grab your wire stripper and strip your wire about 1/2" (1.3 cm) from the end. Repeat for as many wires as needed! I just needed two for my project.

Unscrew the end cap from the female MC4 connector. Remove it along with the compression sleeve. Slide the end cap and compression sleeve over the pin. Insert the male pin into the female connector until you hear a

I'll first show you how to crimp a female MC4 connector. Important: The male metal pin goes with the female MC4 connector. Insert the.

To connect MC4 connectors, simply push the male and female connectors together until you hear a "click." You'll see the male connector's prongs latch on to the body of the female connector.

To connect MC4 connectors, simply push the male and female connectors together until you hear a "click." You'll see the male connector's prongs latch on to the body of the female connector.

Use the appropriate MC4 crimping tool to crimp the connector onto the wire. Ensure that the crimping tool is centered over the connector and apply enough pressure to create a tight connection.

## Photovoltaic panel male and female connector crimping

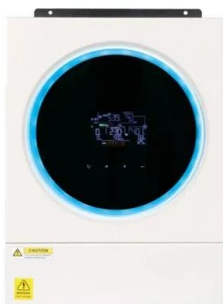

### Renogy Tool Assembly and Disassembly Tool Solar ...
