Photovoltaic panel manufacturers direct sales local delivery

Overview

What is a home solar panel array?

A home solar panel array is made up of components that all work together to convert solar energy into usable energy for your lights, appliances and devices. 1. Solar panels Solar panels are made of photovoltaic cells that convert sunlight to direct current electricity (DC electricity).

How do distributors buy solar systems?

In the past, distributors (a.k.a. middlemen) purchased manufacturers' products in bulk quantities, then delivered them to the stores where you buy them. Today's online, global economy makes this equation more complicated. Here are the avenues for buying solar systems today:.

Should you buy solar panels from a wholesale company?

Other companies purchase surplus or discontinued models and resell them to homeowners. But take care. Older panels may not meet modern efficiency or technical specifications. Purchasing wholesale solar panels can save you money, but it's easy to get burned. Learn how to get the best deals and be a smart wholesale buyer.
