

European Solar and Energy Storage Solutions

Photovoltaic panel pine door

Overview

Are building-integrated photovoltaics a viable alternative to solar energy harvesting?

Historically, solar energy harvesting has been expensive, relatively inefficient, and hampered by poor design. Existing building-integrated photovoltaics (BIPV) have proven to be less practical and economically unfeasible for large-scale adoption due to design limitations and poor aesthetics.

Does Schüco offer a building-integrated photovoltaic system?

The EU Building Directive from 2021 requires a largely balanced energy balance (nearly zero energy) for new buildings. With the combination of highly thermally insulating building envelopes and the Schüco building-integrated photovoltaic system (BIPV), Schüco offers the right solutions.

Do solar roofs need a specialized installation?

Solar Roof systems come in a range of UV-stable, fade-resistant colors and patterns in keeping with design needs. Helpfully, no specialized installation is required, and once installed, their elements require no maintenance because they are treated with an anti-soiling coating that reduces the accumulation of dust and dirt on surfaces.

Photovoltaic panel pine door

Mastercraft® 24"W x 80"H Pine 6-Panel Interior Door Only

6 ???· This wood core door from Mastercraft® offers exceptional detail, giving you the quality and durability your home deserves. The pine veneered door comes ready to finish with your ...
