Photovoltaic panel project financing report

Overview

What are PV Financial models?

come from the PV plant production, capital expenditures (CAPEX) and operating expenditures (OPEX). PV financial models are used by project developers, banks and asset managers to evaluate the profitability of a PV project. The task is to predict the discounted cash flow as.

What are project-level solar PV financing cost data points?

We also summarize project-level solar PV financing cost data points that can be used as simplified benchmarks of the cost of capital and associated fees. All data compiled for the report are derived from a combination of a basic literature review, product research, and interviews with industry professionals.

Where can I find a report on PV project finance?

This report is available at no cost from the National Renewable Energy Laboratory (NREL) at Feldman, David, and Paul Schwabe. 2018. Terms, Trends, and Insights on PV Project Finance in the United States, 2018. Golden, CO: National Renewable Energy Laboratory. NREL/TP-6A20-72037.

Who participates in the financing of solar projects?

Developers, independent power producers, solar panel manufacturers, engineering, procurement, and construction (“EPC”) contractors, utility companies, financial investors and, more recently, commercial and industrial end-users all participate in the financing of solar projects in different manners and at different times.

What financing structures can be used for PV projects?

There are many types of financing structures that can be applied to PV projects, such as corporate financing, which typically has an on-balance-sheet structure as aforementioned, project financing, crowd sourcing, or even

personal credit lines.

Are utility-scale photovoltaic (PV) plants bankable?

In the first half of the chapter, an overview of financing and bankability of utility-scale photovoltaic (PV) plants is provided, with a slight touch on microgrid PV financing. The discussion revolves around risk management, which requires rigorous assessment of the financial viability.
