Overview

A Solar Power Purchase Agreement (SPPA) is a financial arrangement in which a third-party developer owns, operates, and maintains the photovoltaic (PV) system, and a host customer agrees to site the system on its property and purchases the system's electric output from the solar services provider for a.

Figure 1 below illustrates the roles of all participants in an SPPA. Adapted from Rarus Institute's "The Customer's Guide to Solar Power Purchase.

In order to claim a system's on-site solar electricity production towards the Green Power Partnership's green power use requirements, a Partner must retain the associated renewable.

The resources below provide additional information on SPPAs. 1. The Rarus Institute's "The Customer's Guide to Solar Power Purchase Agreements" (pdf) 2. Webinar: Solar Power.

What financing options are available for solar panels?

Power purchase agreements. Many \$0-down financing options are available for going solar, including ownership (i.e., solar loan) or third-party-owned (i.e., leases) solutions. Many homeowners looking for an easy, low-cost, maintenance-free way to install a solar panel system move forward with a power purchase agreement (PPA).

Can a PPA finance a solar energy system?

PPAs are not the only way to receive the benefits of a solar energy system. Individuals can also explore alternative finance options, such as solar leases, loans or direct system purchases. For instance, solar leases allow customers to rent the solar system with little to no , while solar loans offer ownership with financing over time.

Should you buy a solar lease or PPA?

A solar lease or PPA is a good option for homeowners who aren't in a good position to purchase their own system (whether financially or otherwise), are ineligible for solar tax credits or simply don't want to deal with system

maintenance.

How much does a solar PPA cost?

You enter into a PPA contract with a solar company that charges \$0.15 per kWh of solar electricity used. To keep numbers simple, let's say you used 1,000 kWh of electricity and your solar panel system produced 1,000 kWh of electricity in one month.

Are solar PPAs free?

A PPA is a popular financing option for solar energy because it allows the homeowner to use solar energy without paying the hefty up-front cost of going solar. But don't be fooled by a "free solar panel" gimmick — solar PPAs aren't free, and they have their disadvantages. In this article, we'll dive into the pros and cons of solar PPAs.

Can you sell a home with a solar PPA?

You also won't be eligible for any solar tax incentives if you don't own the system. They can make it difficult to sell your home. Although some people really want solar power, many potential homebuyers will not want to take over your PPA. This can make it hard to sell a home with a PPA attached to it.

Photovoltaic panel purchase and sales contract

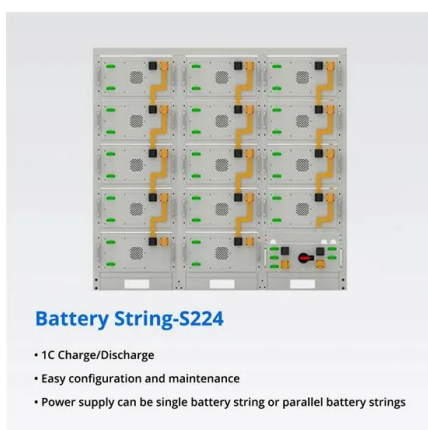

What to Expect from a Solar Contract

You could also sign a Power Purchase Agreement or a PPA, meaning you buy energy from your rooftop solar panels but you don't own the system. An investment company does. Your choice of ownership options ...

Solar Power Purchase Agreement , Solar PPA , Vivint Energy
