Photovoltaic panel water pouring clamp

Overview

What is a PV panels water drained away clip?

The PV panels water drained away clip is a self-fastening clip, made of plastic. The length is about 68 mm, weight 8 grams, and the width is based on the thickness of the panels aluminum alloy frame.

How to install photovoltaic panels?

How to install: First, make the whole surfaces of the PV panels clean, and clasped the water clip to the bottom edge of the panels, and don't tilt it, so it is ok, if it rains again, there will be no mud zone. In order to prevent stepping on the panel glass, you can use the photovoltaic panel protection mat.

How many types of PV panels are there?

The length is about 68 mm, weight 8 grams, and the width is based on the thickness of the panels aluminum alloy frame. Now there have five types: 40 mm, 35 mm, 30 mm; Clasped the water clip to the bottom edge of the PV panel the stagnant water will flows away, there is no fouling again.

What happens if a photovoltaic panel gets dirty?

The accumulation of dirt in the panels edge or in the corners, can have dramatic consequences on the proper functioning of the photovoltaic system, it reduces photovoltaic panel power generation, and will form hot spots effect, reducing the service life of panels.
