

European Solar and Energy Storage Solutions

Photovoltaic panels Cyprus

Overview

What is a commercial photovoltaic system in Cyprus?

Commercial photovoltaic systems in Cyprus are usually used by businesses for self-consumption. That is, the energy generated by the solar panels is solely used for the building where the panels are installed.

What are solar panels used for in Cyprus?

Solar panels in Cyprus are used for residential, industrial and commercial properties. Other than home use, many businesses install photovoltaic panels in Cyprus for self-consumption. That is, they use the energy the photovoltaic system generates directly, but cannot store any excess energy for following months.

Does Cyprus support photovoltaic systems?

The government of Cyprus, along with the RES and Energy Conservation Fund, offers support schemes for the installation of photovoltaic systems. This is because solar power is considered to be the future of energy and promoting the use of renewable energy sources is a priority.

Where can photovoltaic panels be installed in Cyprus?

Photovoltaic systems can be installed on flat and inclined roofs and on the ground. Our team can visit the place where you want the solar panels to be installed, evaluate the amount of space, sun exposure and possible shading and suggest the best place so that you make the most out of your photovoltaic panels in Cyprus.

What are the benefits of solar panels in Cyprus?

The adoption of solar systems and Photovoltaic Solar Panels in Cyprus yields manifold benefits, both environmentally and economically. By harnessing the abundant sunlight, Cyprus can significantly reduce its carbon footprint and mitigate the impact of climate change.

What incentives are available for installing photovoltaic systems in Cyprus?

Homeowners in Cyprus can take advantage of several incentives for installing photovoltaic systems, including the recently announced Grant Scheme for the installation of photovoltaic systems, which provides financial incentives for the installation of photovoltaic systems.
