

Photovoltaic tracking bracket description

Overview

Photovoltaic tracking bracket is a bracket that can follow the rotation of the sun and is used to install photovoltaic power generation components (such as solar panels).

Photovoltaic tracking bracket is a bracket that can follow the rotation of the sun and is used to install photovoltaic power generation components (such as solar panels).

A photovoltaic (PV) tracking bracket is a device used in solar energy systems to maximize the amount of sunlight that reaches solar panels.

Compared with fixed PV mounts, solar tracking brackets can automatically adjust the angle of panels so that they always face the sun and maintain the optimal angle of light reception at different t.
