Overview

Which steel is best for PV mounting?

To do so, it requires a robust supporting structure made from high-quality steel with effective corrosion protection. With ZM Ecoprotect® Solar, thyssenkrupp Steel now offering high-performance, zinc-magnesium-coated steels for PV mounting systems – durable, robust and sustainable.

Does Yieh Phui know the corrosion resistance of solar brackets?

Yieh Phui has professional knowledge to check whether the corrosion resistance of the bracket materials used in the solar photovoltaic power generation industry matches the environment in a case.

What is the best corrosion protection for solar mounting structures?

Your contacts when it comes to high-performance corrosion protection for solar mounting structures: Arne Schreiber, Product Management and Jennifer Schulz, Surface Development. ZM Ecoprotect® Solar offers several advantages compared to pure zinc coatings.

Does ThyssenKrupp steel offer zinc-magnesium based corrosion protection?

With ZM Ecoprotect® Solar, thyssenkrupp Steel is now offering a zinc-magnesium-based corrosion protection solution that is significantly more effective than conventional hot dip galvanizing, and can withstand almost anything that the weather can throw at it.

Why should you choose ZM ecoprotect® solar?

The new coating is the consistent economic further development as an alternative to batch galvanizing. The guaranteed service life of up to 25 years also leads to low maintenance expenditure on the PV ground-mounted systems. With ZM Ecoprotect® Solar, we are clearly offering extra sustainability.

What is China's first ultra-high altitude photovoltaic demonstration base?
