Overview

What storage solutions does Siemens Energy offer?

Currently, Siemens Energy offers BlueVault™ Storage solution for the marine and offshore market and SIESTART for utilities and T&D network operators. For industrial deployment, we offer a customized battery storage solution to meet your unique business needs.

How many battery energy storage systems are there?

Australian and German homeowners had built around 31,000 and 100,000 battery energy storage systems, respectively, by 2020. Large-scale BESSs are now operational in nations such as the United States, Australia, the United Kingdom, Japan, China, and many others. (Source) (Source).

What are the benefits of battery storage systems?

Energy purchased during off-peak hours can be stored using battery storage systems. It can be activated to distribute electricity when tariffs are at their highest, lowering energy expenses. Battery storage systems can also be set up as an uninterrupted power source, which is a useful insurance policy for enterprises.

Is energy storage a good alternative to a PPA?

For renewables developers, energy storage offers a faster alternative to a PPA, which may have a lead time of a year or more. For utilities, energy storage offers relevancy with increased distributed generation.

Why should you choose GE Energy Storage Solutions?

broad portfolio of energy storage solutions can be tailored to your operational needs, enabling efficient, cost-effective storage distribution and utilization of energy where and when it's needed most—and all backed by a GE performance guarantee.

Why should you use GE reservoir energy storage?

Energy storage can help you increase the dispatchability and predictability of renewables, helping to meet strict code and connection permits. GE's Reservoir energy storage solutions integrate across the grid to help our customers do more than they ever thought possible. Ready to get started?
