

European Solar and Energy Storage Solutions

Powerup energy technologies Mayotte

Overview

What is powerup energy technologies?

PowerUP Energy Technologies mission is to improve sustainability and reliability of the energy systems. With a vision for a cleaner tomorrow, PowerUP develops and manufactures high-quality, sustainable energy generation products. Boasting 20 years of experience in fuel cell technology, we stand as an innovator in the fuel cell technology market.

How does powerup generator work?

Clean power, green future. PowerUP's generators are based on proton exchange membrane (PEM) fuel cells, which makes power generation efficient and environmentally friendly. Our fuel cell based generators use hydrogen gas as fuel. The chemical energy of the fuel is directly converted to electrical energy.

Can I share my personal information with PowerUP energy technologies?

Never share sensitive information (credit card numbers, social security numbers, passwords) through this form. This site is protected by reCAPTCHA and the Google Privacy Policy and Terms of Service apply. PowerUP Energy Technologies provides hydrogen fuel cells generators, a sustainable innovative source of energy.

Powerup energy technologies Mayotte

Energy Storage Systems

These energy sources need to be coupled with efficient battery storage systems to ensure an optimal response to the grid demand. to the deployment of large-scale renewable energies at the local, territorial, or national level. For this very ...

PowerUp Energy Technologies

Where is PowerUp Energy Technologies headquartered? PowerUp Energy Technologies is headquartered in Tallinn, Estonia. What is the size of PowerUp Energy Technologies? PowerUp Energy Technologies has 46 total employees. What industry is PowerUp Energy Technologies in? PowerUp Energy Technologies's primary industry is Electrical ...

Everything we know about PowerUP Energy Technologies new ...

Estonian-based PowerUP Energy Technologies recently unveiled its first-ever hydrogen fuel cell generator, dubbed UP400, that is targeting the recreational industry by producing 400W of portable clean energy. Despite being portable, the hydrogen generator is said to not only be durable but also silent with the only emission being water vapor.

Technology

While solar panels and wind turbines are a great source of power, their reliability is limited due to weather conditions. With our miniature smart-grid solutions you can complement your green power generation. If other methods aren't producing enough power, UP® generators will provide the necessary amps.

Hydrogen Myths

The hard fact is that hydrogen gas requires energy to create, and that energy must come from somewhere. As hydrogen becomes a more widespread source of energy, the generation of hydrogen gas will involve ever more renewable energy. The innovation has already occurred, there is only the implementation left to achieve.

Powerup Energy Technologies

PowerUP Energy Technologies was created to improve sustainability and reliability in the energy sector. With a vision of a cleaner tomorrow, PowerUP develops and manufactures high-quality, sustainable energy generation products. Boasting 20 years of experience in fuel cell technology, we stand as an innovator in the fuel cell technology market.

UP200 , PowerUP Energy Technologies

Our novel solution allows you to connect the fuel cell unit in combination with an external battery with solar panels and wind turbines to produce and store excessive energy for future usage. The UP200 integrates fuel cells with ...

PowerUP collaborates with ESA for hydrogen in space

The 1kW closed cathode hydrogen fuel cell technology stack will be used on Lunar cargo ships and potentially even rovers, becoming an additional energy source along with solar panels and batteries. This innovative technology will provide power during extended periods of darkness when solar panels cannot charge the batteries.

PowerUP Energy Technologies OÜ

PowerUP Energy Technologies OÜ produces the best in class portable hydrogen fuel cell generators and proton exchange membrane fuel cells. Our technology is based on our co-founders' 15 years of scientific research in the field of fuel cells and energy technologies.

PowerUP Energy Technologies

PowerUP Energy Technologies , 5,653 followers on LinkedIn. Innovative hydrogen fuel cell based back-up generators , PowerUP provides clean and portable energy by delivering a hydrogen fuel cell backup generator solution that can be used for various industries- including

construction, telecommunications, security & defence, healthcare and many more.

PowerUP Energy Technologies: Revolutionising Telecom ...

PowerUP Energy Technologies is an Estonian deep tech company that develops and produces innovative and environmentally friendly energy solutions. Under the BalticSeaH2 project, PowerUP will develop and test an energy system which has both fuel cell, and electrolyser in one box and can generate green hydrogen and clean electricity by the

UP400 , PowerUP Energy Technologies

Our novel solution allows you to connect the fuel cell unit in combination with an external battery with solar panels and wind turbines to produce and store excessive energy for future usage. The UP400 integrates fuel cells with pioneering battery technologies to make the generator smart.

UP1K , PowerUP Energy Technologies

Our novel solution allows you to connect the fuel cell unit in combination with an external battery with solar panels and wind turbines to produce and store excessive energy for future usage. The

UP1K integrates fuel cells with pioneering battery technologies to make the generator smart.

Careers

PowerUP Energy Technologies is a dynamic and innovative tech startup based in Estonia, dedicated to tackling the global climate crisis by providing clean energy solutions through cutting-edge hydrogen technology. We are seeking a talented and motivated Marketing and Communications Specialist to join our growing team. In this role, you will be a key player in ...

Green ICT

Project update 2022. During the last quarter of 2022 Beyonder has finalized this project's first version of high-power energy storage cells, which will soon be ready for shipment to Nordic Batteries to be included in the first proof of concept battery module in combination with a fuel cell system prototype from PowerUP.
