There are two main ways to calculate the cost of a solar system: 1. Price per watt (\$/W) is useful for comparing multiple solar offers 2. Cost per kilowatt-hour (cents/kWh) is useful for comparing the cost of solar versus grid.

The third - and least accurate - way to get an idea of how much solar panels will cost for your home is to see how much solar panels cost for homes.

There are a few ways to get a rough estimate of how much solar panels will cost without sitting through a sales pitch. These include: 1. Online calculators 2. Hand calculations based on your electricity usage 3. The average cost.
