Solar photovoltaic costs have fallen by 90% in the last decade, onshore wind by 70%, and batteries by more than 90%. One of the most transformative changes in technology over the last few decades has been the massive drop in the cost of clean energy.

How much does one solar panel cost?

The average cost for one 400W solar panel is between \$250 and \$360 when it's installed as part of a rooftop solar array. This boils down to \$0.625 to \$0.72 per watt for panels purchased through a full-service solar company.

NREL analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. This work has grown to include cost models for solar-plus-storage systems.

InfoLink Consulting provides weekly updates on PV spot prices, covering module price, cell price, wafer price, and polysilicon price. Learn about photovoltaic panel price trends and solar panel costs with our comprehensive market analysis.
