How much does a solar inverter cost?

For an average-sized installation, inverters typically range between \$1000 and \$1500. That cost can go up quickly though as the installation gets bigger. Each year, the National Renewable Energy Lab performs a cost benchmark of the solar industry, looking at average installation costs, inverter and panel

costs, and a host of other related topics.

Should you buy refurbished solar panels and inverters?

When considering the purchase of refurbished solar panels and inverters, buyers should verify the products meet the client's energy efficiency expectations, have been thoroughly tested and are cost-effective.

How much does a second-hand solar panel cost?

Second-hand modules are sold according to cost per watt as this is the most standardized way of pricing them, similar to how the prices of new solar panels are compared. As of 2023, the price of a used solar panel can be as low as \$0.10 per watt. Even at \$0.60 per watt, used solar panels are easily snapped up.

Where can I buy used solar panels?

Here are a few resources that can help you learn more about buying used solar panels: Solar Energy Industries Association (SEIA): The SEIA has a number of resources on its website including a solar customer resource portal. National Renewable Energy Laboratory (NREL): NREL's website talks about building a solar powered future.

How long does a solar inverter last?

However, there is a range of other equally important factors to consider before choosing an inverter: Inverters – with an estimated life of around 12 to 15 years – they don't last nearly as long as solar panels, which last 25 to 30 years. Odds are that sooner or later your inverter will need to be replaced.
