Purchase home solar power

Overview

Should you buy a solar-powered home?

Buying a solar-powered home can jumpstart your clean energy transition, joining millions of other American households that are powering their lives with sunshine. See more solar energy resources for consumers and learn how solar works.

Where can I buy solar panels?

Many businesses specialize in selling and installing solar panels for homes. Search online to locate solar panel suppliers and installers in your area. You can start with CNET's best list of solar panel companies. You can even shop for solar panels at major home goods stores like Home Depot.

Is buying a house with solar panels worth it?

If solar is an attractive feature to you, buying a house that already has leased solar panels on it could be worth it. However, the process can be a headache. Make sure you're willing to take on the terms of the lease and deal with the transfer.

Should you lease or buy solar panels?

If you can't purchase solar panels outright or finance them with a loan, leasing solar panels is still a compelling option. You can reduce your electric bill, perhaps take advantage of net metering, and still get the benefit of clean energy at your home.

Should I buy or buy a solar system?

The answer to this for you depends on several factors: There are two main ways to go solar: buying and owning the system or getting it installed on your home while it's owned by a third party. When buying a system, you either need to pay for it outright or finance it with a solar loan.

How do I get the best price for a solar system?

Tax incentives and flexible financing options ensure you get the best price for your solar system. Power your home with emissions-free, renewable energy directly from the sun. You may qualify for federal, state and local tax incentives that can help cut your installation costs.
