Solar panel mounts are used to secure your solar panel array to a surface and can also be used to optimize your panel's energy production through its angle and direction. The type of solar panel mounts that would be required for an array is completely dependent on the specific surface of which the array is being attached.

Your solar installer will know the best option to get the most use out of your solar system. Below is our expert review of solar panel mounting solutions, which highlights the top three solar panel mount brands, and discusses the pros and cons of rooftop solar systems versus ground-mounted systems.
