Rangebank bess Tajikistan

Overview

What is a rangebank Bess?

The Rangebank BESS helps to increase Victoria's renewable energy hosting capacity and provides essential system services that support the safe, secure and reliable operation of Australia's energy system.

Who is constructing the rangebank Bess project?

The project is proudly being developed by Eku Energy and Shell Energy Australia. The Rangebank BESS will be built, serviced, and maintained by Fluence – a global leader in energy storage products and services within the renewable energy and storage sectors.

Who builds the rangebank Bess battery?

The Rangebank BESS will be built, serviced, and maintained by Fluence – a global leader in energy storage products and services within the renewable energy and storage sectors. The battery, built within a 19,250sqm footprint, will utilise Fluence's sixth generation Gridstack™ energy storage technology.

What is a rangebank battery?

The battery, built within a 19,250sqm footprint, will utilise Fluence's sixth generation Gridstack™ energy storage technology. The Rangebank BESS (Battery Energy Storage System) is an industrial scale BESS to be located in Cranbourne West, Victoria, Australia.

Is the rangebank Bess achieving significant milestones?

The Rangebank BESS is pleased to report, following the mobilisation of construction resources in June 2023 under the early works pre-construction approvals, that the project has achieved significant milestones in both the regulatory and delivery elements of the works.

Who owns rangebank?

Melbourne-based real estate company Perfection Private is a minority shareholder in the Rangebank project. GIG said it will transfer its interest in the project to its newly formed battery storage platform Eku Energy, which has a 4 GWh pipeline of utility scale battery projects in the UK, Australia, Japan and Taiwan.
