What type of solar inverter do I need?

String inverters are the most common inverters used in residential solar systems. These inverters connect to multiple solar panels and convert your home's DC energy to AC electricity. String converters work best in homes with little to no shading and simple solar panel designs. Can I replace a solar inverter myself?

.

How do I choose the right solar inverter type?

There are two categories to consider when deciding on the right solar inverter type: the solar inverter technology, and the type of solar power system the inverter is for. String inverter: A string inverter is a single, standalone unit that converts power from a whole string (or strings) of solar panels.
