Founded in 2005, Sanjing is a high-tech enterprise specializing in photovoltaic inverters, energy storage inverters and systems, motor drives and control products. The company has four core technology systems of energy conversion, energy storage, energy management and energy consumption, providing efficient distributed photovoltaic grid .

China's Guangzhou Sanjing Electric (SAJ) has developed two new single-phase and three-phase all-in-one battery inverters with efficiencies of 97.8% and 98.0%, respectively. They use artificial.

· Before opening the housing, the SAJ inverter must be disconnected from the grid and PV generator; you must wait for at least five minutes to let the energy storage capacitors completely discharged after disconnecting from power source. **WARNING** · The installation, service, recycling and disposal of the inverters must be performed.

The SAJ inverter must only be operated with PV generator. Do not connect any other source of energy to the SAJ inverter. properties and persons. The solar inverter will become hot during operation. Please do not touch the heat sink or peripheral surface during or shortly after operation. Risk of damage due to improper modifications.

Is Saj liable if a solar inverter is lost?

SAJ is not responsible for the loss and these warranty claims. The SAJ inverter

must only be operated with PV generator. Do not connect any other source of energy to the SAJ inverter. and persons. The solar inverter will become hot during operation. Please do not touch the heat sink or peripheral surface during or shortly after operation.

What is Saj's new residential battery inverter?

SAJ unveiled a new line of residential battery inverters for residential PV applications at the Genera trade show in Madrid last week. The new products are available in single-phase and three-phase configurations. "It is specifically tailored to the needs of European consumers," said the Chinese battery manufacturer.

Can a saj inverter be wet?

Do not touch the surface of the inverter while the housing is wet, otherwise, this may cause electrical shock. Before opening the housing, the SAJ inverter must be disconnected from the grid and PV generator; you must wait for at least five minutes to let the energy storage capacitors completely discharged after disconnecting from power source.

How big is a saj battery inverter?

They measure 450 mm x 626 mm x 365 mm and weigh 32 kg. The maximum input voltage is 1,000 V and the MPP voltage range is between 180 V and 900 V. SAJ offers seven versions of the single-phase battery inverters, with AC power ratings between 3 kW and 6 kW. The maximum efficiency is 97.6% and the European efficiency is 97%.

What happens if a saj inverter is unauthorized?

Any unauthorized actions including modification of product functionality of any form may cause lethal hazard to the operator, third parties, the units or their property. SAJ is not responsible for the loss and these warranty claims. The SAJ inverter must only be operated with PV generator.
