# Removing the photovoltaic panel bracket

## Overview

---

There are several possibilities as to why you might need to detach and replace solar panels. Listed below are some of the most common ones: .

The detachment and reinstallation of solar panels is a multistep process. However, once you hire a professional solar service for the job, the rest of the procedure is straightforward. Assuming.

For an average small-scale residential solar energy system, it normally takes only 1 to 2 days to detach the solar panels and approximately the same amount of time to reinstall them. Of course, you also need to account for the time.

Follow these steps:1. Start with the topmost panel in your array and work your way down.2. Loosen the mounting hardware, such as brackets or clips, that secure the panels to the roof.3. Gently lift each panel and slide it out of the mounting system.4. Place the panels on a secure surface to avoid any potential damage.

Follow these steps:1. Start with the topmost panel in your array and work your way down.2. Loosen the mounting hardware, such as brackets or clips, that secure the panels to the roof.3. Gently lift each panel and slide it out of the mounting system.4. Place the panels on a secure surface to avoid any potential damage.

Here is a high-level step guide to removing your panels:Turn off the power to your solar panels.Remove the mounting hardware.Disconnect the wiring.Remove the solar panels.Store the solar panels in a safe place.
