S-type solar bracket

Overview

What is the best solar panel mounting system for metal roofs?

S-5! ProteaBracket for Trapezoidal Metal Roof Solar Panel Mounting
ProteaBracket™ when combined with solar panel mounting rails or the S-5 PV Kit, is a versatile PV mounting solution for exposed-fastened metal roofs. It fits most trapezoidal sheet metal roof profiles with and without intermediate insulation.

What is a S-5 clamp & bracket?

Clamps Designed for standing seam and concealed-fix metal roof profiles, S-5! clamps can be used to mount ancillary components directly to the roof seams, without the need for any additional interfacing hardware. S-5! Brackets S-5! brackets are designed for mounting on exposed-fix (face-attached or thru-fastened) metal roofs.

What is a S-5 bracket?

Brackets S-5! brackets are designed for mounting on exposed-fix (face-attached or thru-fastened) metal roofs. Bolt Balance of System components directly to the appropriate bracket without additional interface hardware. provides a dependable and corrosive-resistant attachment solution.

Will S-5 clamps Pierce metal roof panels?

S-5! Clamps & Brackets for Metal Roof Solar Panel Systems Attachment of solar panel system arrays on a metal roof has always been difficult and often the source of leaks and maintenance problems until and brackets. Thanks to their patented round-point setscrews, S-5! clamps will not pierce the metal roof paneling or violate system warranties.

Can S-5-PVKit be used on a metal roof?

The S-5-PVKit can be used to mount solar PV without traditional rails on standing seam and exposed-fastened metal roof profiles. Explore Solar With

S-5!.

What are clamp and bracket components in S-5!?

S-5! offers clamp and bracket components designed to provide secure, engineered attachment between the roof and the rails or tilted rack. S-5! standard and Mini clamps meet the stringent requirements for solar installations on metal roofs and remain the choice for popular rack and rail solar PV systems.
