Development - BrightNight

From inception to the start of construction, the BrightNight development team places the customer at the center of every step. At BrightNight, our experienced team of developers leads each project through the complex development process with a commitment to safety, cost management, and community partnerships.

Projects

Bright Renewables offers renewable gas solutions globally to a diverse range of clients, including project developers, plant owners, and entrepreneurs. This wide-ranging client base underscores our capability to meet varied needs, demonstrating our commitment to advancing sustainable energy for any industry.

Bright Renewables , The World Biogas Expo

Bright Renewables is a family company and the only fully integrated global provider of renewable gas technologies and carbon capture, from manufacturing to maintenance. We excel in biogas upgrading, CO2 purification & liquefaction, biomethane liquefaction, bio-CNG, and carbon capture, with the industry's largest in-house production facility

LIGNA Exhibitor 2023: Bright

Renewables

Bright Renewables provides biogas upgrading, CO2 liquefaction, and Carbon Capture systems, along with expert support throughout the entire process, from engineering to commissioning. Our systems are designed to ensure high availability and low maintenance costs, with quick commissioning and advanced automatic controls that respond to biogas

Bright Renewables

A bright idea for the perfect biogas plant solution. Bright Renewables (Bright Biomethane) with their vast experience offers support throughout all process steps from engineering to commissioning and final acceptance. The smart design combined with high quality components guarantee high system availability and low maintenance cost.

Bright Renewables , Renewable Gas Systems & Carbon Capture

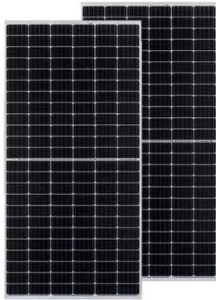

System uszlachetniania biogazu Bright Renewables oraz skraplanie CO2, bio-LNG i bio-CNG jako idealne technologie dodatkowe tworzy kompleksowy pakiet zwi?kszej?cy wydajno?? i zrównowa?ony rozwój biogazowni. Nasza

technologia wychwytywania dwutlenku w?gla dekarbonizuje instalacje spalania, przekszta?caj?c CO2 w cenny produkt.

Bright Renewables

Bright Renewables (Bright Biomethane) offers well-proven systems to upgrade biogas to biomethane in standard capacities from 40 Nm³/hr to 5,000 Nm³/hr (and higher). This makes Bright Biomethane one of the few suppliers able to deliver the total range from small to large biogas upgrading installations.

Biogas Upgrading: PurePac

Bright Renewables is a one-stop-shop for biogas upgrading, offering systems for the upgrading of biogas and landfill gas. Specifically designed for biogas, our PurePac upgraders utilize membrane technology to ensure high-quality purification. For landfill gas, we employ a dual approach, combining membrane technology with pressure swing

HoSt Group & University of Twente to construct Benelux's first e

Bright Renewables and HyGear, both part of the HoSt Group, together with the University of Twente, are set to construct Benelux's first e-methanol system. Their joint project, 'Towards Acceleration and Demonstration of E-Methanol'

(TANDEM), has received a total subsidy of nearly EUR4 million, covering half of the total EUR8 million

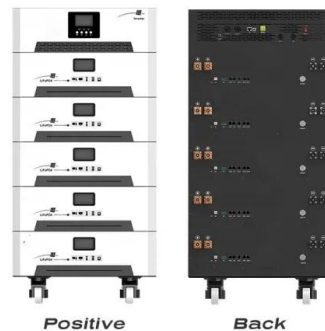

About Us: Your Upgrade, Our Shared Future , Bright Renewables

We are the indispensable technology partner, with in-house service and maintenance, across all our technologies, and commit to leading the renewable gas industry through technological advancement, focusing on sustainable production.

Bright Renewables , Erneuerbare Gas Systeme & Carbon Capture

Das Biogasaufbereitungssystem von Bright Renewables und die CO₂-Verflüssigung, Bio-LNG und Bio-CNG als ideale Zusatztechnologien bilden ein umfassendes Paket zur Steigerung der Effizienz und Nachhaltigkeit von Biogasanlagen. Unsere Technologie zur Kohlenstoffabscheidung dekarbonisiert Verbrennungsanlagen und verwandelt CO₂ in ein wertvolles

Bright Renewables' PurePac upgrader

Join Bright Renewables in the Renewable Energy Revolution Unlock biogas potential with advanced biogas upgrading technologies. The upgrader is engineered to transform organic waste into high-purity renewable natural gas (RNG), ready for grid injection or use as bio-CNG/LNG.

Our Projects - BrightNight

This project marks our second partnership with LG& E KU in bringing large-scale renewable energy enterprises to the region. Through this project, Ballard County will support local landowners as they invest their property for development, positioning itself as a regional leader in clean renewable energy that will attract future investment from
