# Salaba energy Azerbaijan

## Overview

---

In 1847, Azerbaijan became the site of the world's first industrially drilled oil well. By 1899, Azerbaijan produced half of the volume of the world's oil. The Araz hydroelectric power station with a total capacity of 22 MW was constructed in 1970, Tartar hydroelectric power station with a total capacity of 50 MW in 1976 and Shamkir hydroelectric power station with a total capacity.

How much energy does Azerbaijan need?

Azerbaijan's energy demand (measured as total energy supply [TES]) was 16.1 million tonnes of oil equivalent (Mtoe) in 2022 (according to preliminary data from the State Statistical Committee). Azerbaijan is a major producer of crude oil (32.7 Mt including natural gas liquids in 2022) and of natural gas (35.0 bcm in 2022).

Where does energy come from in Azerbaijan?

Two-thirds of energy in Azerbaijan comes from fossil gas and almost a third from oil. Azerbaijan is a major producer of oil and gas, much of which is exported. Most electricity is generated by gas-fired power plants.

What is Azerbaijan's energy potential?

According to the Ministry of Energy, the country's technical potential for small hydro is 520 MW, which could generate up to 3.2 TWh annually. Azerbaijan's Renewable Energy Agency under the Ministry of Energy (formerly SAARES) states that the country has up to 800 MW of geothermal energy potential.

Which energy sources are used in the transport sector in Azerbaijan?

Most oil products used in the transport sector are produced in Azerbaijan. TFC consists mainly of natural gas (43%) and oil products (39%), followed by electricity (15%). Renewable energy sources, including hydro, contributed 1.5% to total energy supply in 2022 and 6% (1.8 TWh) to electricity supply.

What is Azerbaijan's potential for small hydropower?

Although hydropower is Azerbaijan's largest source of renewable energy

today, its potential has not been fully exploited. According to the Ministry of Energy, the country's technical potential for small hydro is 520 MW, which could generate up to 3.2 TWh annually.

Where does Azerbaijan rank in energy architecture?

According to the World Energy Trilemma Index, compiled by the World Energy Council for 2017, Azerbaijan has taken the 31st place (BBA) among 125 countries. According to the Global Energy Architecture Performance Index report 2017, compiled by the World Economic Forum, Azerbaijan ranked 36th out of 127 countries with a 0.67 score.

## Azerbaijan: Energy, Carbon, and Opportunities

At the end of 2023, after prolonged discussions, Azerbaijan was selected as the host country of the 2024 United Nations climate summit, COP29. Like the two preceding hosts of COP28 and COP27, the United Arab Emirates (UAE) and Egypt, Azerbaijan is also a major oil and gas producer.

## Green energy: A new dimension in Azerbaijan-Türkiye relations

The Azerbaijan-Türkiye III Energy Forum, held in Nakhchivan on Sept. 29, 2023, was focused on establishing Nakhchivan as a "green energy region." During the forum, discussions centered

## Green energy: A new dimension in Azerbaijan-Türkiye relations

The Azerbaijan-Türkiye III Energy Forum, held in Nakhchivan on Sept. 29, 2023, was focused on establishing Nakhchivan as a "green energy region." During the forum, discussions centered on creating a 1,500 MW renewable energy facility, combining wind and solar power, in Nakhchivan, with plans to export 1,000 MW of electricity to Türkiye.

## Azerbaijan Energy Profile

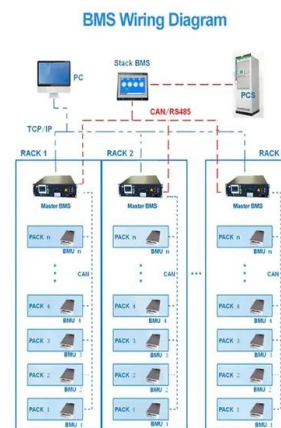

Key energy data . Supply Azerbaijan's energy demand (measured total energy supply [TES]) was as 16.1 million tonnes of oil equivalent (Mtoe) in 2022 (according to preliminary data from the State Statistical Committee). Azerbaijan

is a major producer of crude oil (32.7 Mt including natural gas liquids in 2022) and of natural gas (35.0 bcm in
