Selling solar panels and photovoltaic panels

Overview

One of the biggest strikes against solar for the past several decades has been the cost. But that's all changed. The cost to install solar has dropped by more than 70% over the last decade, leading the industry to expand into new markets and install thousands of systems across the U.S. Specifically, an average-sized.

In 2020, 43% of all new electric capacity added to the grid came from solar. This is the largest share in history and marks the second year in a row that solar has added the most.

For years, the state of California dominated the solar market with over 8 million homes powered by solar. But other markets are expanding rapidly and in 2020, other states.
