Overview

What is Senegal's energy policy?

The IEA's Energy Policy Review of Senegal 2023, published today, finds that energy is at the heart of Senegal's 2035 strategy for accelerating sustainable development and economic growth known as the Plan Sénégal Émergent (PSE), or the Emerging Senegal Plan.

Why is Senegal implementing a gas to power program?

As mentioned above, Senegal is implementing a gas to power program in the energy sector. The purpose of the program is to convert existing thermal power plants to dual-fuel and to build future thermal power plants using natural gas as a primary energy source.

How will Senegal's power sector be strengthened?

Senegal's power sector would be strengthened by continued diversified investment in power, including renewables and natural gas, while phasing out heavy fuel oil. Senegal Energy Outlook - Analysis and findings. An article by the International Energy Agency.

Can Senegal use natural gas to generate electricity?

Senegal has major ambitions to use domestic gas resources to generate electricity through its "gas-to-power" strategy decided in 2018, which aims to reduce national energy dependence on oil and coal by incentivising investment in natural gas as a transitory fuel in the energy transition.

What is the energy mix in Senegal?

In 2013, the Republic of Senegal adopted the strategic energy plan, which aimed to increase the energy mix dynamic in the country for a five years (2013-2018). The energy mix refers to the development of power generation from coal, gas, hydro, solar and wind. Current percentages of power generation:.

Will Senegal become an oil and gas producer in 2024?

This partnership could mobilise up to EUR 2.5 billion to support Senegal's efforts to achieve universal energy access and strengthen a resilient, secure and sustainable energy system that fosters sustainable development and economic growth. In 2024, Senegal is expected to become an oil and gas producer.

Senegal

In Mauritania and Senegal, Kosmos and its partners are developing the Greater Tortue Ahmeyim Project (GTA), an innovative offshore liquefied natural gas project that has the potential to be a source of domestic energy and revenue for both countries.. Kosmos entered Senegal in 2014 when it acquired its original acreage position which was adjacent to, and on trend with, our ...

Senegal Energy Outlook - Analysis

Senegal's economy could grow six-times larger in the AC while limiting growth in energy demand to three-times its current level by utilising new gas resources and boosting the use of renewables in power. In the AC, gas meets a growing share of energy demand while traditional use of biomass starts to decline in rural areas.

Senegal

Gas production from Sangomar will provide the energy needed to power a plant with a capacity of between 350 and 590 MW, while the St. Louis offshore block could power a 250 MW plant. To reduce production costs, existing plants will be converted to dual fuel/gas while new plants will be built using natural gas-fired combined cycle (CCGT).

Executive summary - Senegal 2023 - Analysis

In 2022, Senegal spent almost 4% of its gross domestic product (GDP) on energy subsidies. The government pledge to reduce this share to 1% by 2025 is a major and welcome reform commitment. The roadmap in place guides the implementation in the coming years. The IEA applauds Senegal's energy policy approach and the active work and plan under way.
