Why is China focusing more on solar photovoltaic (PV)?

The solar photovoltaic (PV) power is abundant, clean, and convenient and also has been considered as one of the most promising renewable energies [5, 6]. Due to the ever-increasing energy and environmental pressures, China is switching to focus more on fostering the PV industry.

Can solar PV help China's poorest?

A review of photovoltaic poverty alleviation projects in China: current status, challenge and policy recommendations. *Renew. Sustain. Energy Rev.*94, 214–223 (2018). Murray, S. F. Solar PV can help China's poorest.

Do GSS spur innovation in solar PV technology?

Nicolli and Vona find GSs in 19 EU countries have spurred innovation in PV technology from 1980 to 2007. With patent data of 25 OECD countries over the period of 1978–2003, Johnstone et al. find the positive innovation impact of GSs on solar PV technologies.

How can suppliers promote solar PV panels?

Therefore, suppliers can cooperate with influencers (e.g., celebrities on Facebook) who are influential in the field of solar P.V. panels and invite them to introduce the information and benefits of solar P.V. panels on their page and encourage their followers to purchase.

Does government subsidies affect photovoltaic energy production in China?

This research was funded by the National Social Science Foundation of China (20BGL046). Government subsidies (GSs) have triggered a remarkable increase in the production capacity of photovoltaic (PV) electricity in China. However, the lack of core technologies has limited PV enterprises.

Does community management influence household adoption of rooftop solar

photovoltaics in rural China?

This paper examines inequality in household adoption of rooftop solar photovoltaics in rural China through a qualitative study of three villages. The Chinese government promotes distributed solar to drive low-carbon development. However, community management and China's institutional system influence unequal access.
