Silfab solar Martinique

Overview

What makes silfab solar panels unique?

Silfab solar panels are designed and engineered specifically for the North American environment. We incorporate advanced robotics, automation and the latest innovations in solar technology into our manufacturing process to deliver efficient, reliable, high-quality panels with one of the lowest defect rates in the industry.

Who is silfab solar?

“Silfab Solar is leading the way in US integration of innovative solar cells and modules by investing in the research and development that allows us to deliver the most advanced, powerful and reliable PV solar for commercial, residential and soon, BIPV customers,” said Silfab Solar President and CEO Paolo Maccario.

What happened to silfab solar?

PREVIOUS COVERAGE: MacDonald said York County suggested the warehouse on Logistics Lane, and by the end of 2022, Silfab Solar Inc. agreed, filed a zoning application for the facility, got county approval, and moved in.

What's new at silfab solar in South Carolina?

Silfab's newest factory in South Carolina will soon add 1 gigawatt American-made cell production and another 1.3 gigawatts of module production. BURLINGTON, Wash., May 20, 2024--Silfab Solar advances its program to manufacture next-generation, USA-made solar cells.

Why is silfab a sustainable company?

For the past several years, Silfab has dedicated strategic resources to manage accelerated, sustainable growth and continued expansion in the U.S. with the goal of controlling its own supply chain and launching a solar cell manufacturing facility.

What is silfab solar doing with n-type solar cells?

Silfab Solar is developing the cells on a 300 MW pilot line, which will operate alongside its main n-type cell manufacturing at its South Carolina facility. The company said that the project will enable the rapid scale-up of cost-effective back-contact cell technology into high-volume production of its next line of solar modules.
